If brother Tony is on vacation, should Marc or you drive this? - Johan needs help, especially as he is up to his neck in the Swedish, Finnish and Baltic tobacco law drives.
Thanks and regards, Stig

See my profs note regarding this issue: I think Johan makes number of very important points.
May I pose a first and important practical question: Who should take the lead in our planning? - You, Tony, someone else with ETS experience (and capacity) in Legal? - Our US ETS team?
Most grateful for a speedy reply,
thanks, Stig

Stig,

the more I read the programme, the more I feel like we should give this event very serious consideration and carefully plan how to best tackle this. I think only one alternative is outruled: the industry/us watching this event as passive by-standers.

Hence, the idea of either us or perhaps the Norwegian NMA or Langaard submitting a statement to the conference/the media should carefully be looked into.

We could even consider a dual approach: a statement by the Norwegian NMA, and some PM/STA representatives participating. This I say well aware of the fact that participating in this would be no picknick and would require besides careful risk assesment, also extensive preparations.

The printed programme includes the following: "Plenary discussion
